# Secure your project with Optimism grant support

Trail of Bits has partnered with Optimism to offer pre-paid security assessments to projects deploying on Optimism.

1 Design
Design Assessment

2 Implementation
Early Stage Assessment
Invariant Development
Threat Model

Blockchain

4 Deployment
Rapid Risks Assesment

3 Validation
Comprehensive Code Assessment

We will collaboratively determine the required number of engineering weeks for your project and identify the auditing service(s) best suited for your codebase and development stage.

Benefits

Reduce financial risk: Save development time and cost with design and early stage reviews.

Short & long-term recommendations: Receive recommendations for improving not just the code but your overall security, and training on tools used and custom rule sets.

Proactive, not reactive: Anticipate and solve security issues before they arise, ensuring a more efficient and resilient development process.

Grant funded: Trail of Bits received funding through Optimism's RFG–3, allowing us to perform these assessments at no cost to you.

Who should apply?

- New or existing to Optimism Ecosystem

- Project is in any stage of development

- Project is smart contract or DeFi, Bridges, Gaming app, or Offchain components

SCHEDULE A MEETING WITH TRAIL OF BITS

Trail of Bits was among the first security-oriented organizations transitioning from the Web 2.0 space to explore blockchain technologies. We have become experts in reviewing all facets of blockchain applications, from smart contracts to off-chain components.

Contact Us → Project Scope → Approval → Assessment → Report & Recommendations

The grant is offered until January 2025, but we recommend early engagement to secure your spot, given the limited capacity for project acceptances.
